

As part of the recycling process MobileMuster breaks down mobile phones into components such as batteries, plastics, circuit boards and accessories.

This highly efficient process means that over 90% of the materials used in mobile phones and accessories can be recovered and used to make new products.

Wires plastic, copper

SIM card

plastic, copper iron, tin, nickel

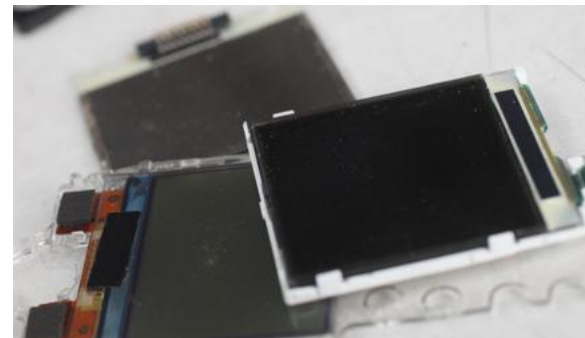

Mobile phone accessories

plastic, aluminium, copper

Screen

silicon dioxide, aluminium silicate, potassium, europium, sodium, yttrium, phosphorous, neodymium, zinc

Buttons plastic

Antennae & transmitter

lead, plastic, copper, nickel, iron

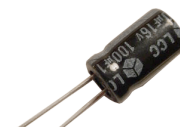

Casing & Frames

plastic, aluminium, scandium

Capacitors Nickel, Tantalum, Palladium

Microphones & Speakers neodymium, lead, iron copper, samarium

Battery

Lithium oxide, Nickel cadmium or Nickel metal hydride.

Circuit Board

plastic, copper, zinc, gold, tin, iron, platinum, cobalt manganese, silver, nickel, epoxy resin
